

Drying tunnel KN 800

SCHULZE

**No three-phase
400 V necessary**

**Fits through any door.
Machine width: 70 cm**

**Operating temperature
reached in 4 min.**

The **KN 800** can be used for drying textiles as well as DTF foils, paper, plexiglas and other materials. It is suitable for water-based paints, plastisol paints and solvent-based paints and is equipped with long-life ceramic radiators. The KN 800 channel heats up in 4 minutes. A connection to an exhaust system should be made (\varnothing 125 mm) to remove any harmful vapours from the workplace.

Special features for DTG

- + Bright colours after fixing
- + No press impression due to fixing
- + Print result feels like a screen print

Special features for DTF

- + Perfect gelation of the hotmelt adhesive
- + Further processing immediately possible

Technical data

Transport bandwidth	45 cm
Operating temperature reached	in approx. 4 Min
Heating length	64 cm
Inlet	50 cm
Outlet	50 cm
Power	3,3 kW
Operating voltage	230 VAC
Max. Flow height	8 cm
Max. Temperature	220 °C
Drying time	from 1 to 6 min
Type of drying	Ceramic radiators
Dimensions	69 x 161 x 113 cm
Weight	81 kg
Article number	801045
